

Considering **LEED** for your next building?

Instructor Bio

Jim Bochat, President of Commissioning Concepts, is a LEED-AP, a member of ASHRAE, and a member of NEBB. Jim has been instrumental in developing National Commissioning standards since 1993. He has served as the international President of NEBB, National NEBB Commissioning Committee Chairman, and currently serves as a technical Commissioning instructor and Committee member for NEBB.

Jim has taught commissioning throughout the USA and in Australia and has been a speaker for groups such as RMA, IRC, NYCERTA, PECI, NEBB and AMCA of Australia. His career has included HVAC design, Process design, Mechanical construction, Controls design and construction, Commissioning and Retro Commissioning. This wide range of experience allows him to provide Technical Commissioning Services to a greater depth than most commissioning firms.

Commissioning Concepts now offers Technical Training sessions for Building Owners and Developers who desire to obtain Industry information about the LEED process and how to make the process practical and effective so that they can provide a building with truly lower operating costs.

“Making **LEED** Work” Training Session

Benefits and Challenges of Key LEED Areas

- Sustainable Sites
- Water Efficiency
- Energy & Atmosphere
- Material & Resources
- Indoor Environmental Quality
- Innovation & Design

Key Problem Areas

- Material Management record keeping
- Optimized Energy Performance
- Measurement & Verification
- IAQ Blow Down
- Controllability of Systems

Meeting LEED and maximizing performance

Meeting LEED and minimizing costs

This one hour training session is followed by a question and answer period.
